

SYBO GAMES TO PLANT 200,000 TREES WITH PARTNER ECOLOGI COINCIDING WITH UN CLIMATE CHANGE CONFERENCE UK 2021 AMID MASSIVE GLOBAL CLIMATE CRISIS

Play 2 Plant Initiative Underway

COPENHAGEN - As World leaders meet in Glasgow for the UN Climate Change Conference UK 2021, SYBO Games announces it has partnered with Ecologi to plant 200,000 trees amid the global climate crisis. An active Subway Surfers gamer base will **Play 2 Plant** as they run during the Vancouver update this month, and propel SYBO's real life donation to help our planet by planting trees in forests across the globe. And, as the Subway Surfers worldwide community powers SYBO's commitment to sustainability, they will also experience a related in-game simulated virtual environment as they plant trees and green their worlds.

"As U.S. President Biden said this week, 'We know what to do, we just have to do it,' and at SYBO, we are doing it with Play 2 Plant," said CEO Mathias Gredal Nørvig, SYBO Chief Executive Officer. "We have the opportunity to spread important messaging about steps we can all take together to help our planet and move towards a more sustainable ecosystem. We are running at this crisis together with our players."

Ecologi is a global social enterprise dedicated to positive climate solutions. Through its tree-planting partners like SYBO and others, Ecologi can responsibly plant millions of trees a month.

Beginning November 4 through November 21, players can choose the **Play 2 Plant** event in *Subway Surfers:*

Vancouver, select their hoverboard and run! During the event, the users will be running in a faded version of New York, and they will need to use hoverboards in order to bring the environment back to life. The city will become greener as the players unlock challenge milestones while running on their selected hoverboard. The <u>Ecologi Subway Forest</u> illustrates in real-time the type of tree species planted, its age, where and by who. SYBO will keep players updated on Subway Forest milestones via in-game mailbox messages to all players and showcased on Subway Surferssocial media.

SYBO holds a deep commitment to sustainability and **Play 2 Plant** is the latest activation leading to Subway Surfers' 10th-anniversary celebration in June 2022.

The partnership with Ecologi further demonstrates SYBO's commitment to executing on the Company's core values, including sustainability, inclusivity, diversity and kindness. Earlier this year SYBO launched updated pronouns in the game and in September, SYBO partnered with <u>Born This Way Foundation</u>, a nonprofit organization co-founded by Lady Gaga and her mother Cynthia Germanotta, as part of their #BeKind21 campaign with a multi-pronged campaign centered on mental health and kindness.

SYBO takes its commitment to sustainability seriously. In 2019, SYBO was among the two dozen companies taking the Play for the Planet pledge, committed to actively using their platforms to inform, nudge and take meaningful action in the fight against climate change, and SYBO invests in projects and companies working for a green transition, such as AIC in Chile, which develops water purification technology; Boston-based Clover, which produces sustainable fast food; and the London-based green investment fund Impax. SYBO annually purchases 200 tons of CO2 allowances to offset office and travel activities by 200 percent. SYBO has also installed solar panels on the roof of its office building in Copenhagen, which meets the majority of the facility's power needs.

Subway Surfers continues to top the charts and widespread recognition with well over three billion downloads since its launch. In 2020 Subway Surfers saw more than 100 million monthly active players and was the second most downloaded mobile game of the year. Subway Surfers holds the title as the most downloaded game in Google Play's 10-year history - and the first game to cross one billion downloads. It also is the most downloaded endless runner game in Apple's App Store's history.

About SYBO Games:

SYBO Games is a Danish mobile games developer founded in 2010, known for the massive mobile hit Subway Surfers (co-developed by Kiloo). Danish animation school graduates Sylvester Rishøj Jensen and Bodie Jahn-Mulliner founded SYBO in 2010 after winning first prize for best animation movie in 2009. Their short film gave birth to Subway Surfers, which they further co-developed with Kiloo, a Danish games publisher. Today, the game studio is completely self-published and continues to develop regular updates for Subway Surfers.

Subway Surfers topped 2019's most downloaded mobile game in the world, with more than 3 billion downloads to date. To find out more, please visit www.sybo.com.

About Ecologi

Ecologi is a platform for real climate action. They facilitate the funding of carbon reduction projects and tree planting around the world. To date, Ecologi has planted over 24 million trees and funded climate solution projects that have reduced over 800,000 tonnes of CO2. It's mission is to reduce 50% of global CO2 emissions by 2040 and responsibly plant billions of trees every year.

To do this Ecologi calls on individuals & businesses to take personal responsibility and help tackle the biggest threat of our generation. Collectively, with a little input from a lot of people, we have the power to secure our future.
